

# Comparing the Clinical Impact of Pancreatic Cyst Surveillance Programs and Associated Biomarkers

Status: RECRUITING

## Eligibility Criteria

Age: 50 years to 75 years old

This study is NOT accepting healthy

Healthy Volunteers: volunteers

### Inclusion Criteria:

\* Patient must be  $\geq 50$  years and  $\leq 75$  years of age \* Patient must not have acute pancreatitis or a history of chronic pancreatitis \* Patient must have received a CT, MRI, or EUS within 6 months prior to enrollment that revealed one or more  $\geq 1$  cm pancreatic cyst(s). \* Patients of childbearing potential must not be known to be pregnant \* Patient must not have a prior diagnosis of pancreatic malignancy of any type \* Patient must not have a history of pancreatic resection \* Patients with only pancreatic lesions without malignant risk (pancreatic pseudocyst or classic serous cystic lesion) are not eligible \* Patient must not have a family history of pancreatic adenocarcinoma in one or more first-degree relatives (biological parents, full siblings or children) \* Patient must not have pancreatic cyst morphology that would prompt immediate surgical consideration (enhancing mural nodule, solid component in cyst, pancreatic duct  $\geq 10$ mm, cyst causing obstructive jaundice) \* Patient must not have a comorbid illness that precludes EUS or pancreatic cyst resection \* Patient must not be in any form of pancreatic cyst surveillance for  $> 1$  year, defined as organized, periodic up-to-date imaging directed towards the pancreatic cyst of interest \* PRIOR TO ADDENDUM #5 08/13/2024: Patient must be  $\geq 50$  years and  $\leq 75$  years of age \* PRIOR TO ADDENDUM #5 08/13/2024: Patient must not have acute pancreatitis or a history of chronic pancreatitis. \* PRIOR TO ADDENDUM #5 08/13/2024: Patient must have received a CT, MRI, or EUS within 6 months prior to randomization that revealed one or more  $\geq 1$  cm pancreatic cyst (s). \* PRIOR TO ADDENDUM #5 08/13/2024: Patients of childbearing potential must not be known to be pregnant. \* PRIOR TO ADDENDUM #5 08/13/2024: Patient must not have a prior diagnosis of pancreatic malignancy of any type. \* PRIOR TO ADDENDUM #5 08/13/2024: Patient must not have a history of pancreatic resection. \* PRIOR TO ADDENDUM #5 08/13/2024: Patients with only pancreatic lesions without malignant risk (pancreatic pseudocyst or classic serous cystic lesion) are not eligible. \* PRIOR TO ADDENDUM #5 08/13/2024: Patient must not have a family history of pancreatic adenocarcinoma in one or more first-degree relatives (biological parents, full siblings or children). \* PRIOR TO ADDENDUM #5 08/13/2024: Patient must not have pancreatic cyst morphology that would prompt immediate surgical consideration (enhancing mural nodule, solid component in cyst, pancreatic duct  $\geq 10$ mm, cyst causing obstructive jaundice). \* PRIOR TO ADDENDUM #5 08/13/2024: Patient must not have a comorbid illness that precludes EUS or pancreatic cyst resection.

## Conditions & Interventions

### Interventions:

PROCEDURE: Biopsy Procedure, PROCEDURE: Biospecimen Collection, PROCEDURE: Computed Tomography, PROCEDURE: Endoscopic Ultrasound, PROCEDURE: Endoscopic Ultrasound-Guided Fine-Needle Aspiration, PROCEDURE: Magnetic Resonance Imaging, OTHER: Quality-of-Life Assessment, OTHER: Questionnaire Administration, PROCEDURE: Surgical Procedure

### Conditions:

Pancreatic Neoplasm

## More Information

Contact(s): Dickens, Ariana - dickensa5@vcu.edu

Principal Investigator: Trevino, Jose

### IRB

Number: HM20020533

System ID: NCT04239573
