

A Study to Evaluate Vimseltinib in Adults With Active Chronic Graft-Versus-Host Disease (cGVHD)

Status: RECRUITING

Eligibility Criteria

Age: 18 years and over

This study is NOT accepting healthy

Healthy Volunteers: volunteers

Inclusion Criteria:

1. Must be allogeneic hematopoietic stem cell transplant (HSCT) recipients with moderate to severe cGVHD requiring systemic immune suppression. a. May have persistent active GVHD (aGVHD) and chronic GVHD (cGVHD) manifestations (overlap syndrome). 2. Participants with active cGVHD who have received and failed at least 2 prior lines of systemic therapy. 3. Stable dose of systemic corticosteroids is permitted but not required. If being taken, participants should be on a stable dose of corticosteroids for at least 2 weeks prior to starting study drug treatment. 4. Adequate organ and bone marrow functions. 5. Participants of reproductive potential agree to follow the contraception requirements. 6. Karnofsky Performance Scale (KPS) of ≥ 60 .

Exclusion Criteria:

1. Has aGVHD without manifestations of cGVHD. 2. Prior use of colony-stimulating factor 1 receptor (CSF1R) inhibitor for cGVHD. 3. History or other evidence of severe illness, uncontrolled infection, or any other conditions that would make the participant unsuitable for the study. 4. History of malignancy except for: 1. Underlying malignancy for which the transplant was performed 2. Malignancy treated with curative intent and with no evidence of active disease present for more than 3 years prior to enrollment and felt to be at low risk for recurrence. 5. Malabsorption syndrome or other illness that could affect oral absorption.

Conditions & Interventions

Interventions:

DRUG: Vimseltinib

Conditions:

Chronic Graft-Versus-Host Disease (cGVHD)

Keywords:

Allogeneic hematopoietic stem cell transplant (HSCT), Graft-Versus-Host Disease, GVHD, cGVHD, Graft versus host disease, Immune System Diseases, Organizing Pneumonia, Bronchiolitis Obliterans, Bronchiolitis, Bronchial Diseases, Respiratory Tract Diseases, Lung Diseases, Obstructive, Lung Diseases, Bronchiolitis Obliterans Syndrome, Graft vs Host Disease, Sclerosis, Fibrosis, Hematopoietic stem cell transplantation, Liver diseases
