

Screening for AL Amyloidosis in Smoldering Multiple Myeloma

Status: RECRUITING

Eligibility Criteria

Age: 40 years and over

This study is NOT accepting healthy

Healthy Volunteers: volunteers

Inclusion Criteria:

* Patients 40 years of age and older * diagnosed with either Smoldering Multiple Myeloma or a Monoclonal Gammopathy * dFLC greater than 23 mg/L * abnormal FLC ratio * If the patient has an eGFR less than 50 mL/min/1.73m², the FLC ratio is inconsequential. The patient only needs to meet the age and dFLC criterion.

Exclusion Criteria:

* Patients younger than 40 years of age are not eligible * Patients with a previous finding of amyloid in other biopsies will not be included * Adults unable to consent are not eligible, including the cognitively impaired Pregnant women, pregnant minors, minors (i.e., individuals who are not yet adults), wards of the state, non-viable neonates, neonates of uncertain viability, and prisoners are not eligible

Conditions & Interventions

Conditions:

Smoldering Multiple Myeloma

Keywords:

SMM, AL Amyloidosis
