

A Study to Investigate the Efficacy and Safety of Frexalimab Versus Tacrolimus in Adults Undergoing Kidney Transplantation

Status: RECRUITING

Eligibility Criteria

Age: 18 years to 70 years old

This study is NOT accepting healthy

Healthy Volunteers: volunteers

Inclusion Criteria:

* Participants who are scheduled to receive their first kidney transplant from a living or deceased donor. * Participants with low to moderate immunological risk.

Exclusion Criteria:

* Deceased donor kidney graft qualified as expanded criteria donor or donor after cardiac death. * Positive T or B cell crossmatch, or positive virtual crossmatch per local practice at screening. * Participants receiving a kidney graft from HLA-identical living-related donors, or have current or previous solid organ, cell, or multi-organ transplantation, or paired kidney transplantation. * Participants whose primary causes of ESKD are idiopathic FSGS, C3 glomerulopathy, lupus nephritis, or thrombotic microangiopathy * Evidence of active or latent TB, HIV, HBV or HCV infection. * Participants who have known genetically predisposed thrombophilia, have history of thromboembolic events, or who need long-term anti-coagulation therapy. * Participants who have severe medical co-morbidities, active infection, or severely limited life expectancy due to underlying medical conditions that are generally precluded from kidney transplant. The above information is not intended to contain all considerations relevant to a participant's potential participation in a clinical trial.

Conditions & Interventions

Interventions:

DRUG: Frexalimab, DRUG: Frexalimab, DRUG: Tacrolimus, DRUG: rabbit anti-thymocyte globulin, DRUG: mycophenolate mofetil, DRUG: mycophenolate sodium, DRUG: methylprednisolone, DRUG: prednisone

Conditions:

Kidney Transplant Rejection
